## Summary

Finishing my last semester pursuing a BA in computer science specializing in software engineering. Additionally, I will finish with a philosophy minor that has help balanced my academic pursuit. I have experience with Vue, React, Node.js, C++, Python, and PostgreSQL from classes taken and personal projects undertaken. Currently, I'm progressing as an after-school instructor at KidzToPros, making sure the kids have fun while learning about simple programming skills through block coding. I believe my strengths lie in my positive, motivated, and balanced approach to learning computer science.

## Experience

### **Instructor**

Brains & Motion Education

Nov 2023 - Present (5 months)

### **Property Management Assistant**

Davis Enterprises

May 2023 - Aug 2023 (4 months)

Over the summer, I assisted in the maintenance of properties including landscaping and cleanup.

Additionally, I worked on organizing property details onto excel.
